Carbon - Bond Organic Nutrition

## What is intraMAX™?

intraMAX™ is a 100% carbon-bond organic micro-complexed™ liquid trace mineral supplement, plus an all-in-one multivitamin and much more. It contains:

- Over 415 essential carbon-bond organic micro-complexed™ nutrients
- 71 organic trace minerals
- Health promoting and life sustaining super foods and phyto-nutrients

## Why do I need organic minerals?

"Every ailment, every sickness and every disease can be tracked back to an organic mineral deficiency."\* True 100% organic microcomplexed™ minerals are critical to maintain health and prevent illness and disease. Without proper amounts of organic minerals:

- Vitamins and other nutrients are less effective
- Cells cease to function
- Immune system weakens
- Nervous system deteriorates
- The body begins to age more rapidly

## Do I get enough organic minerals from my food?

The answer is no. "99% of Americans are deficient in organic minerals because inorganic toxic chemicals, pesticides and herbicides have destroyed nearly all the critical living organic minerals, elements, and complexes in our soils. A marked deficiency in any one of the more important minerals actually causes disease."\*\*

## What makes intraMAX™ unique?

Other products contain mostly inorganic synthetic minerals and elements, which are too large to be absorbed into cell walls. After years of research, intraMAX™ is the only product of its kind with:

- 100% Carbon-bond organic microcomplexed™ trace minerals
- Proprietary intraCELL™ V Technology
- Virtually 100% cell absorption, utilization and nutritional benefit

## What does intraCELL™ V Technology do for me?

1

Inorganic toxins accumulate over time in the human body. These toxins are insoluble and synthetic making it impossible for the human body to break them down. As a result, the body permanently stores the toxins in fatty tissues, interstitial fluids (extra-cellular spaces), and intra-cellular spaces, where the toxins may cause toxicity and disease.

2

intraMAX™ delivers non-toxic organic (living) carbon into the human body. Once inside the body, the carbon instantly locates and attaches to any inorganic toxins that are present. Each bottle of intraMAX™ contains 144,500 mg/l of proprietary organic (living) carbon. This organic carbon is the key to providing maximum nutrients and benefits to the body.

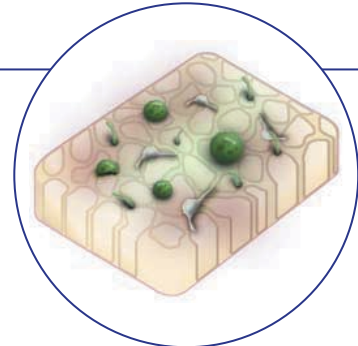

3

When the organic carbon attaches to the inorganic toxins polymerization occurs and a new non-toxic polymer is quickly created. The newly formed polymer is then instantly broken down into ultra-tiny (ultra-chelated) non-toxic organically microcomplexed™ particles. The previously insoluble, synthetic toxins are now in a form the human body can process.

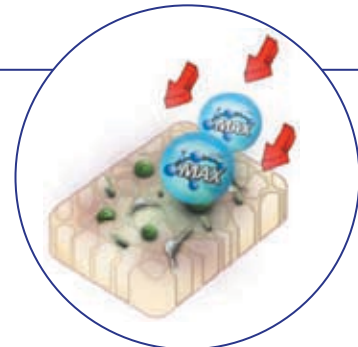

4

The converted toxins are released and removed from the body through the skin, urine, and colon. intraCELL™ V Technology continues to infuse the body's cells with the over 415 essential nutrients in intraMAX™ resulting in vibrant health for the whole body!

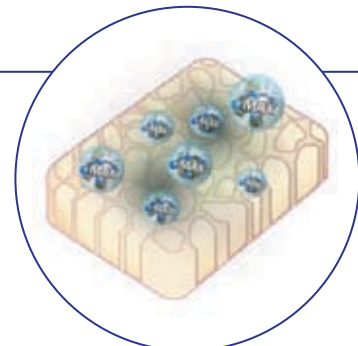

## Out with the bad, in with the good

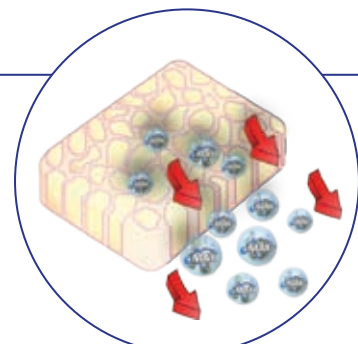

Intestinal wall or fatty tissue with inorganic toxins

intraMAX™ finds toxins and attaches to them

intraCELL™ V Technology captures the toxins

The toxins are then released and removed
